ABSTRACT

This PkM activity for Lecturers with Outside Activities (Community Service) aims to accompany SDN Rogoyudan in implementing character education based on the Pancasila student profile. Teachers at SDN Rogoyudan experience problems in mastering knowledge and information as well as guidelines for implementing the Pancasila student profile. Therefore, the implementation of the Pancasila student profile has not run optimally because apart from the guidelines that have not been mastered, there is also a lack of facilities and infrastructure that support the aim of forming the character of the Pancasila student profile.

Kata Kunci: Character education, Pancasila student profile, elementary school
