ABSTRACT

This community service program is aimed at helping teachers of Early Childhood Education in Desa Mulyodadi to enhance their capabilities in teaching English for young learners by using creative methods to make the lesson they taught interesting and fun so that the children will be more motivated and enthusiastic to learn English. To achieve that goal, a workshop was held. This consisted of two sections: creating simple learning media and employing nursery rhymes to teach English for children.

The results of the workshop show that: 1) participants were able to create simple learning media to teach English for children, 2) participants were able to utilize English nursery rhymes as a fun English learning media for young learners, and 3) participants can teach English by using both media confidently.
