

Training for Making Learning Videos to Support Online Learning for Elementary School Teachers in Sanden District, Bantul

by Ali Mustadi, Enny Zubaidah, Septia Sugiarsih, Octavian Muning Sayekti, Evy Nur Rochmah.

ABSTRACT

In this era of the covid-19 pandemic, learning is carried out ONLINE (in the network). Where in this learning the teacher must be creative and innovative in designing learning because the teacher cannot explain the material directly face to face. Based on a survey conducted to 57 elementary school teachers in the Yogyakarta area, the problems faced by teachers include limited internet access, limited availability of online learning support tools, limited knowledge about the development of learning media, limited ability to develop assessment tools. Learning media used ONLINE should contain visual messages so that they are not too verbal so that children are more interested and easy to understand the material. Through this online learning media, it is expected to be able to increase the efficiency and effectiveness of learning. There are many types of online learning media that can be used. Namely, interactive multimedia, powerpoint, video, and others. Learning video is one of the media that can be developed easily by the teacher. In the learning video the teacher can greet students, provide reinforcement, visual motivation, and explain the material to the maximum. To make it easier for teachers to make videos, training in making powerpoint-based learning videos is needed. The purpose of community service activities for the development of this area is to provide training for elementary school teachers so that they can make learning videos that can support ONLINE learning. The methods of this PPM activity are: (1) lectures, discussions, and questions and answers, (2) tutorials and practice. The results of the PPM activities carried out May 21-29, 2021 with the theme of making learning videos to support online learning, namely teachers can produce products in the form of powerpoint-based learning videos for online learning.
