

IMPLEMENTATION OF INFORMATION LITERATION IN THE MIDDLE SCHOOL OF BANTUL DISTRICT

by MM WAHYUNINGRUM,MM

ABSTRACT

Abstract of the Research Plan

This study aims to describe the efforts of school library staff in the implementation of information literacy in high schools throughout Bantul district. The aspects examined include how to find, evaluate, use, and communicate information in the library. This research is quantitative descriptive. The population in this study is library staff. Data collection method uses questionnaire. Test the validity of the data using construct validity while the data reliability test uses the Alpha Cronbach formula. The technique used to analyze data is the analysis of descriptive data with percentages.

The target to be achieved in this study is the identification of the efforts of all school residents in the implementation of information literacy in schools. This is done with the hope that after various efforts have been identified in the implementation of information literacy, schools will be able to develop and realize the creation of information literate communities.
