ABSTRACT

The aim of PPM activities is to provide appropriate technology skills (TTG) for making instant herbal medicine products and ginger-based antibacterial soap that are easy to apply in the community at PP Al-Imdad, Bantul. The method used in PPM activities is to provide training and assistance in making instant herbal medicine products and antibacterial soap based on ginger. The PKM activity which was carried out at PP Al-Imdad, Bantul, was attended by 30 participants. The benefits obtained are increasing the skills and motivation for entrepreneurship for students.

Kata Kunci: *herbal soap, temulawak*
