

# DEVELOPING SCIENTIFIC CULTURE OF DLINGO 1 HIGH SCHOOL STUDENTS TROUGH TRAINING OF WRITING SCIENTIFIC

by Bambang Suprayitno, Tejo Nurseto, Supriyanto, Ahmad Chafid A.

## ABSTRACT

Education is a long-term investment that cannot be avoided even though the benefits obtained are only obtained in a few years later. Training is a form of education in the short term, one of which is training in writing scientific papers. Training of scientific papers at Dlingo Bantul 1 High School needs to be done with the aim of increasing students' interest in making scientific work in the form of research or thought studies, making students able to determine the problem of the desired topic and using appropriate writing methods in making scientific work, and able to optimize the utilization the internet in support of making scientific work.

The solution to the problem is training and assistance in the form of material presentation, assistance and presentation of scientific papers. The material presented included training on problem determination, determining the methods used and overall making of proposals. This training also explained how the use of the internet for writing and extracting sources of literature and data. Moreover, there will also be training on presentation of reports on scientific writing.

In general, the implementation of PPM has been running by seeing indications of satisfaction and enthusiasm given in the implementation of PPM. De facto, training is still ongoing with the guidance of making scientific work by students after it is made during training. The activity was attended by 23 participants from the beginning to the end so that the atmosphere of the training class was not lonely and empty. Although not many people actively asked questions, all participants carefully followed the training activities.
