

Workshop on Student's Research Group in Senior High School

by Kun Sri Budiasih, Eli Rohaeti, Indyah Sulistyo Arty, Senam, .Cahyorini Kusumawardani

ABSTRACT

“KIR” or Student’s Research Group activities have a close relationship in character building. Character means tool for making, to engrave. Well Organized research groups will be able to bring students to manage groups and together while learning to do research and become the formation of a scientific culture at school.

The research idea can come from anywhere, the student's home environment, or the school environment. Research is not something that has to be completely new, but can be a modification and innovation of existing ideas. Development and Guidance of KIR in SMA, whose success depends on the cooperation of several stake holders. These are include stakeholders in the school (principals, teachers), school facilities, teachers, students, and the parents. KIR is important for schools, for teachers, and for students themselves. KIR activities must have full support from the school because it will increase the school's competitive value. KIR development programs include proposal writing training, general stadium to open insight, science camp, and so on. Evaluation of KIR coaching activities showed that 87% of participants stated that this activity was very useful for increasing knowledge in coaching, while 13% said it was quite useful. As many as 92% of participants stated new insights about KIR development, while 8% said they already knew. 75% of participants said they really needed assistance, while 25% said it was enough. 100% of participants stated that all presenters could deliver the material very well.
