

# **BUILD TOKIJO CHARACTER FOR METAL ELEMENTS OF MAINS GROUP**

**by Sukisman Purtadi, Dina, Rr. Lis Permana Sari**

## **ABSTRACT**

An exploratory analysis has been done to determine the TOKIJO character representing the main metal elements. This analysis is part of a research development that uses research-based design research methods. The analysis is done by comparing the characteristics of the prominent elements and their use in daily life (indigenous knowledge) in the student environment and the characteristics of the appropriate wayang figures. From this analysis developed 10 (ten) characters TOKIJO which represent ten element metal main class in puppet character.

Kata Kunci: *TOKIJO, character, instructional media, indigenous knowledge, chemistry of the elements*
