ABSTRACT

This PPM activity aims to 1) Increase the teacher's knowledge and skills for techniques and procedures to utilize and develop simple media to support learning in elementary school, 2) The production of simple media which can be used in the learning process in elementary school, 3) The creation of articles about simple media which are ready to be published in national journals. This PPM activity was carried out in Batur Elementary School in Batur sub-district with 24 participants. The method used was Lecture and Question and Answer, Demonstration, Practice and Assistance / tutorial. Lecture and question and answer methods are used to understand participants about making educational game tools. The practice method was used to provide opportunities to make educational games for one topic in a particular subject. Mentoring method was used to assist participants in making a simple media so that good results are obtained.

The results of PPM Simple Media Utilization and Development activities at Batur District Primary School can be concluded in 1) The knowledge and skills of participants about the techniques and procedures for using and developing simple media are increasing. 2) This training activity has produced simple media such as charts, cards with pictures and snakes and ladders game that can be used to support learning activities in elementary schools.
