

DEVELOPING the WRITING CULTURE of SMP N 1 BANTUL STUDENTS THROUGH TRAINING OF JUVENILE SCIENTIFIC WRITING

by Bambang Suprayitno, Tejo Nurseto, Supriyanto

ABSTRACT

Education is a long-term investment that can not be avoided needs even though the benefits gained are only found in the next few years. Training is a form of education in the short term, one of which is training in writing scientific papers. The training of scientific work in SMP N 1 Bantul needs to be done with the aim of increasing the students' interest in making scientific work in the form of research result or thinking study, making the students able to determine the problems of the desired topic and using the proper writing method in making scientific work, and able to optimize the utilization internet in supporting the making of scientific papers.

We carried out training and mentoring in the form of material exposure, mentoring, and presentation of scientific papers. The materials presented include problem-solving training, determining the methods used and overall proposal-making. This training also explains how the use of the Internet to create the writing and extracting resources library and data. Moreover, there will also be training on presentation of scientific paper writing reports.

In general, the implementation of this social work has been done by looking at the indication of the satisfaction and spirit given in the implementation of PPM. The de facto, the training is still ongoing with the guidance of making scientific work by the students after it was created during the training. The event was attended by 28 participants from start to finish so the atmosphere of the training class was not empty and empty. Although not so many are actively inquiring, but all participants take carefully the existing training activities.
