

Professional Improvement of Science Teacher of DIY Province through Workshop of Role and Function of Professional Association of PPII (Perkumpulan Pendidik IPA Indonesia)

by Insih Wilujeng, et al

ABSTRACT

Pengabdian Kepada Masyarakat (PkM) aims to: 1) provide understanding to science teachers in DIY for the role and function of PPII; 2) to arrange workshop pattern in PPII that leads to the professionalism of science teachers; and 3) to know the response of science teachers to workshop on improving the professionalism of teachers that was accommodated by PPII. The activities of PkM include the socialization of the PPII, formulating the problems in the science lesson, planning the program of activities (including selection of targets, participants, places, and workshop pattern, establishing operational. guidelines, schedule, and training materials); implement program and program evaluation. The result of PPM activity was formed by the board of PPII of Yogyakarta city branch, compiled list of problems related to the improvement of teacher professionalism, arranged workshop pattern, and implementation instruction and technical guidance of each workshop pattern for problem solving
