

The Utilization of Charcoal Briquette on the Women Culinary Business Group

by Kun Sri Budiasih

ABSTRACT

In order to minimize the budget of the energy consumption in the culinary business, people need to choose the alternative energy source. One of the source is based on biomass. The charcoal side product can produce charcoal briquette which have a high calor capacity. Information of this alternative energy source was needed by small business in culinary. A soft campaign was carried out to bring the information from the academic filed into the business activities.

Kata Kunci: *charcoal, briquette, culinary, women*
