

# VALIDITY ASSESSMENT TO DEVELOP DEVELOPMENT TESTS FOR PENCAK SILAT FROM TWO DIFFERENT EXPERIENCE GROUPS USING AIKEN'S V

by Awan Hariono, Budi Aryanto, Cukup pahalawidi

## ABSTRACT

**Abstract.** The purpose of this study is to develop a talent identification test for pencak silat. Content validity is used to test the instrument. Testing is done by using professional judgement by involving experts in the field of learning and pencak silat training. The analytical technique used is the validity coefficient of Aiken (V) to determine the relevance of each content of the test. This study used nine experts with the assessment scale ranging from 1 to 4 with criterion 1(irrelevant), 2 (less relevant), 3 (relevant), and 4 (very relevant). There are sixteen test items from the test that are assessed by the experts. The value of validity coefficient of Aiken's V for the pencak silat talent identification test was 0.82 to 0.89.
