## **ABSTRACT**

This training was conducted to answer the need for Javanese preservation of the children in Yogyakarta because of the reduced use of Javanese in the social environment of children. Book Gladhi Basa Jawa is a product of development research which later became the medium to teach Javanese krama for children in order to train kindergarten teachers in Yogyakarta. This training is aimed to enable teachers to use Gladhi Basa Jawa book to develop Javanese vocabulary for children while playing. The training method used in this training is the lecture method to increase the teacher's knowledge about how to teach the Javanese language to children, demonstration methods to provide an overview on the teacher how to use the book Gladhi Basa Jawa for children in learning, and direct practice method of microteaching is used to try / practicing the use of Gladhi Basa Jawa books for children in front of the trainees. The results of the training show that 78.2 percent of participants have knowledge of Javanese learning for children, able to use learning steps using Gladhi Basa Jawa book, and able to practice how to use Gladhi Basa Jawa book for children in learning.
