ABSTRACT

ABSTRACT

In the current era of coronavirus pandemic, people are required to reduce outdoor activities that affect the economy. One of the efforts to prepare for the recovery of economic conditions by providing skills training and knowledge about creative industries that can be used as capital to increase income. The environment around Al-Muthi'in Orphanage has many resources that can be raised to be developed in the form of creative industries, one of which is the waste of patchwork produced from small convection industries in Yogyakarta. Creativity and innovation of the students of Al-Muthi'in orphanage needs to be developed in order to capture the opportunities around it. The purpose of training to increase creativity of handicrafts of economic value, provide knowledge, insight into the entrepreneurial spirit for the youth of Al-Muthi'in Orphanage so that it can be worth selling, and open home industry opportunities for teenagers Al-Muthi'in Orphanage as an effort to improve the welfare of the family. The target of this activity is the youth of Al-Muthi'in Orphanage in Maguwo village, Wonocatur Banguntapan Bantul. This activity is carried out by methods of lectures, demonstrations, training and practice. Based on the results of the manufacture of gadget protective products made of patchwork can be known that participants understand and antusian in the manufacture of such products seen from gedget protective products produced by the participants. Through this training, the orphanage youth have the skills to improve the quality of human resources that can be used as a provision to open businesses while creating jobs.
