

**TRAINING AND ASSISTANCE FOR THE MAKING OF ORGANIC FERTILIZER WITH EM-4 TECHNOLOGY  
IN DEDEL WETAN hamlet, DADAPAYU VILLAGE, SEMANU DISTRICT, GUNUNGKIDUL REGENCY**

**by Eko Widodo, Benni Setiawan, Suranto Aw, Endra Murti Sagoro**

ABSTRACT

The purpose of the PPM-KKN is to increase knowledge and technology among the community that are useful for increasing the success of agricultural businesses, so that they can become assets that continue to benefit from an economic, social, cultural and welfare perspective. The PPM-KKN activity methods used in empowering the target group are as follows, observation and interviews, socialization, training and mentoring. The role of KKN and DPL students in the application of appropriate technology increases, partnerships between students who have various skills can be realized and good cooperation, knowledge and technology among the community (farmers) increased and the success of farmers in agricultural business also increased.
