ABSTRACT

Modulation in singing is an ability that can increase the creativity of students. The purpose of this service activity is to provide training on modulation learning methods for elementary school teachers. The activity was carried out at SD Negeri 2 Jampiroso Temanggung which was attended by 43 participants, committees, and resource persons. The conclusion obtained from these activities is that the modulation learning method workshop is very necessary to improve the musicality of elementary school students. The teachers are able to teach singing technique with modulation, this is shown by the success of elementary students in singing with modulation. The availability of modulated music accompaniment is very helpful for teachers and students to sing with modulation techniques. The workshop participants were very satisfied and saw that the activity was very useful, and interesting. Based on this, the workshop activities on the modulation learning method need to be continued.
