

DEVELOPMENT OF WORKSHEET BASED CHARACTER TO IMPROVE HONESTY AND LEARNING INDEPENDENCE IN THE ERA OF THE COVID-19 PANDEMIC FOR CLASS IV STUDENTS

by Wuri Wuryandani, Fathurrohman, E. Kus Eddy Sartono, Suparlan, Hendra Prasetya

ABSTRACT

This study aims to develop appropriate character-based worksheets to increase honesty and independence in learning in the Covid-19 pandemic era for fourth grade elementary school students.

This study uses a research and development design. The research steps are a) conducting preliminary research, b) planning, c) developing a prototype of the product being developed, d) expert testing, namely 1 material expert, and 1 media expert. The research subjects in the preliminary study were 26 elementary school teachers in Yogyakarta. Validation is carried out by 2 people consisting of material expert validators and media experts.

The results showed that the process of developing character-based LKPD to increase honesty and independence in learning in the era of the covid-19 pandemic for elementary school students went through several stages, namely identification of potential and problems, needs analysis (techniques, objectives and content) and data collection, design (content and content). display), implementation (creation of content, display, work test questions, and merging PDF files), validation (media and material experts), revision of LKPD with features of Themes, Subthemes, Subject Content, Material Content, IT Info, evaluation questions that can be filled students, Glossary, Interactive Question Exercises. The results of the feasibility analysis of the character-based LKPD for fourth grade elementary school students, namely: a) Assessment of media experts, character-based LKPD in terms of media is categorized as very good with a percentage of 86.2% an average of 4.31, b) Assessment of material experts, LKPD-based multimedia in terms of material is categorized as very good with a percentage of 95.6% with an average of 4.78, c) Overall multimedia-based worksheets are categorized as very feasible with a percentage of 90.9% and an average of 4.54.
