ABSTRACT

Translation of theory into the realm of practical entrepreneurship require considerable strengthening to create a formidable individual in running the entrepreneur who needs the motivation and giving a real example to potential businesses to be able to start new businesses and create new jobs. The primary target in the provision of these motivations are young people who have great potential to start a new business and develop it in the future.

After completion of training in entrepreneurship and business plan of making the team held a devotion to society in the form of theory and practice, the trainees are expected to make a business plan in their respective business later. To further after completion of training the trainees are expected to be motivated to make a business plan on their businesses.

Based on the description of the implementation of these service activities, it can be concluded that the participation of devotion by 85% of participants actively take part and express attitudes pleased and enthusiastic service activities. The enthusiasm depicted by the request that a similar event is held back by the ongoing training program.
