

COMMUNITY UNDERSTANDING OF THE EXISTENCE OF "PANCASILA VILLAGE" (CASE STUDY IN PANCASILA VILLAGE, MANJUNG, NGAWEN, KLATEN)

by Taat Wulandari, Anik Widiastuti, Nasiwan

ABSTRACT

ABSTRACT

Pancasila is a basic ideology for the Indonesian state and to be a good citizen in Indonesia must be in accordance with Pancasila. This is what underlies the importance of Pancasila as a reference or guide on how to behave as a good citizen (good citizen) in Indonesia. Pancasila contains 36 points of very noble values ??practiced by all Indonesian people. One of the people who have concrete steps and actions in developing the values ??contained in Pancasila is Manjung Village. Manjung Village is located in Ngawen District, Klaten Regency. One of the Regencies in Central Java Province.

Research is a qualitative research. The research location was in the Manjung village, Ngawen District, Klaten Regency, Central Java Province. The data source is the community in Manjung Village. Determination of respondents using purposive sampling techniques. Data validity uses respondent triangulation. Data analysis techniques were performed using descriptive analysis techniques.

Community understanding of the Pancasila Village Concept so far is that there are still some community members who do not understand how the Pancasila Village concept should be implemented/carried out by the Manjung Village community, as well as the lack of socialization from the village government in presenting the desired objectives of the Pancasila Village. The people of Manjung village have actually applied Pancasila values ??in their social life before establishing Manjung Village as Pancasila Village, only the community did not realize that they had implemented these values ??because all of these activities had already proceeded by themselves and became a habit and relations between villagers run well, harmoniously, without harmony in terms of religion, social status and others.

Kata Kunci: *Pancasila Village, Community understanding*
