

LEARNING DEVICE DEVELOPMENT TRAINING FOR TEACHERS IN SMA N 1 SANDEN BANTUL

by Alice Armini, Siti Perdi Rahayu, Roswita Lumban Tobing, Dian Swandajani, Herman

ABSTRACT

ABSTRACT

The purpose of this activity is to overcome the difficulties of teachers in planning and implementing learning devices. The teacher as a professional educator acts as a facilitator in learning and demands creativity to develop learning devices so that he can teach his students with quality. However, it is a fact that there are teachers in SMA N 1 Sanden Bantul do not have the insight and skills to develop adequate learning devices. The lecturers in the French Language Education Department at FBS UNY held a training in developing learning devices in the form of developing lesson plans for teachers in SMA N 1 Sanden Bantul so that they could improve the quality of learning in their assignments. The method used was discussion and group work. The discussion was conducted to exchange experiences between the speakers and the teachers as well as between the participants in the activity. In the workshop activities, the teachers were divided into several groups. This training was held for 2 days on 17 and 18 June 2019 so that the participants were able to develop and implement learning devices. The result of the training shows that the participants felt the need to do similar activities because learning devices are important in the learning process.
