## ABSTRACT

Apart from being used to improve education and prioritizing availability for many users to read, published research can be used for teachers and students to improve their quality. However, many teachers and students are constrained in this case, because they didn't have enough experience to publish their research work. In this regard, a scientific publication training is needed which can help teachers and students to write their research results as published articles. This training aims to ensure that teachers and students have the knowledge and skills to publish scientific papers of the research they have done.

This service uses a training and mentoring approach. In training activities, we conduct training for teachers and students on preparing manuscript to be published online. This training activity is continued with mentoring for participants online, so that at the end of the program participants can submit articles in accredited or reputable journals.

This service was carried out online, which was attended by 74 participants, of 88 persons who registered. At the beginning of the implementation, a workshop was conducted on publication strategies using Zoom media, then continued with assistance in writing scientific papers until submission in reputable national and international journals. The assistance was carried out through the Whatsapp application. The implementation went smoothly, and based on the results of the evaluation, this service activity was in accordance with the needs of the participants, the material and depth were according to what the participants needed and was very useful, and the service process of the service when carrying out the service was satisfactory.
