

DEVELOPMENT OF MEDIA THAT ACCOMMODATES DIVERSE LEARNERS KIT NGOTO ELEMENTARY SCHOOL

by UNIK AMBARWATI, SAFITRI YOSITA R, MARDJUKI

ABSTRACT

The purpose of this study is to produce learning media in the form of diverse learners kits. This media development is a continuation of previous year's research to complement diverse learners modules that can be used by teachers and elementary students.

This research was carried out at SD Negeri Ngoto Bantul by using research and development (R & D) methods. The stages in this study consisted of: (1) needs analysis, (2) product design development, (3) initial product formative evaluation. The validation process is carried out by 1 material expert and 1 media expert. Collecting formative evaluation data is done by using assessment sheets for aspects of display quality, presentation of material, and learning process with quantitative analysis with descriptive analysis techniques.

The quality of Diverse Learners Kit media from media experts is in the very good category with a mean of 4.2. The assessment of material experts obtained an average of 4.5 if converted into qualitative data can be concluded well.
