Pelatihan Pembuatan Jadwal Pelajaran Menggunakan Software bagi Guru Koordinator Jadwal SMK/SMA Se-DIY

by Deny Budi Hertanto, M.Kom.

ABSTRACT

In this training, teachers who became the coordinator of the timetable will be taught and assisted to learn how to create a timetable using software. The training consists of two parts. The first is to learn how to install and learn to use the program schedule. Second, do the scheduling in accordance with the material of their respective schools.
Software that will be used in this training is paid. Trainees will be given the freedom to use the software that they think most easy to use / apply at each school.
Of the participants with the number of 26 teachers, all of them can be trained from the beginning to the end. As a result, each participant is able to make the appropriate schedule each school. Schedules that have been made are expected to be directly applicable in each school.
