ABSTRACT

Abstract

Mastering the Professional Competencies of Elementary School Teachers is still a problem in the field, especially for prospective professional teachers. This is very important because it is a framework that identifies their knowledge in teaching effectively with a technological framework. The research aims to describe the professional abilities of prospective elementary school teachers who are undergoing PPG PGSD Study Program at LPTK Yogyakarta State University.

This research is quantitative descriptive. The research subjects were 120 pre-service PPG participants from the PGSD LPTK UNY study program. The data collection technique is observation of the learning process with the subjects being pre-service PPG students and the observers being their respective civil service teachers. Data analysis uses central tendency to describe the professional abilities of prospective elementary school teacher students who have undergone PPG.

The research results showed that the aspects of mastering the material, structure, concepts and scientific mindset that support the subjects taken were achieved at 85.85%. The aspect of mastering competency standards and basic competencies in subjects or areas of development achieved was 87.33%. The aspect of developing learning materials that was pursued creatively reached 86.42%. The aspect of developing professionalism in a sustainable manner by taking corrective action reached 86.86%, the aspect of utilizing information and communication technology to communicate and develop oneself reached 85.25%. Overall, the professional competency of prospective PPG Pre-Service graduates was achieved at 86.34%.
