ABSTRACT

The PkM report is a statement regarding the research results at MA Al Imdad Pajangan Bantul. This activity aims to train MA Al Imdad Pajangan Bantul teachers to understand and develop innovative learning media and increase creativity in developing creative learning media. Apart from that, it also aims to increase the percentage of innovative learning media in all subjects, as well as train MA Al Imdad Pajangan Bantul teachers to make the best creative learning media. There are many obstacles that teachers must face in developing learning media. Learning media development training departs from the finding that many teachers still experience difficulties developing learning media at the planning stage. These include choosing the most appropriate platform, determining the materials that somebody can use, and carrying out evaluations. At the media development stage, many teachers still need help because they are unfamiliar with using tools, especially those based on information and communication technology. Teachers are also expected to be able to raise the enthusiasm of students by using innovative learning media. From the results obtained, the MA Al Imdad Pajangan Bantul teachers could organize and develop creative learning media well.
