

Training on the Application of Webinars as Efforts to Optimize Teacher Professionalism in the Scope of Online Learning at SMK Negeri 1 Plered, Bantul Regency

by Pramudi Utomo, Mashoedah, Umi Rochayati, Indra Hidayatulloh, Aris Nasuha, Suprpto

ABSTRACT

This community service program carried out by the Lecturer group aims to provide training on strategies for implementing webinars as an effort to innovate and increase teacher professionalism in the scope of online learning.

The training method is carried out through the delivery of material online, followed by the practice of using a browser related to the training material. There are six training material topics. Each topic is delivered by a lecturer. The training participants were 31 teachers from SMKN 1 Pleret Bantul. The participants came from the electrical power installation engineering competency expertise program.

The results of the training achieved are that participants can understand the potential of online learning as a medium for delivering learning which is quite efficient if managed properly. Participants can practice one of the training materials, namely the use of an anti-cheat browser during the exam.
