

pelatihan pengembangan buku monitoring cabang olahraga renang di DIY

by agus supriyanto, lismadiana

ABSTRACT

The objectives of the Community Service Program with the title of Swimming Pool Monitoring Program Development Training in the Special Region of Yogyakarta are as follows: (1) Increased insight and knowledge for swimming trainers in designing swimming monitoring books and (2) Improving skills for swimming trainers in the use of books swimming monitoring.

The Book Sports Monitoring Branch Development Training Activity in the Special Region of Yogyakarta was held at Yogyakarta State University Wates Campus on 29-30 July 2017. The number of training participants was 40 people. The methods taken are lectures, questions and answers, demonstrations, direct practices, and evaluations.

The results of the activity are as follows: (1) A total of 40 participants who participated in the Swimming Sports Branch Monitoring Development Training in Yogyakarta Special Region, (2) Implementation of the Swimming Sports Branch Monitoring Training in the Special Region of Yogyakarta received a good appreciation from the target audience. and (3) 85% of training participants can understand and can implement the use of swimming monitoring books properly through direct practice. The suggestions that can be conveyed in the Community Service activities are as follows: (1) There is a need for a monitoring book guidebook in swimming sports to facilitate the trainers in monitoring during the training process and recorded as evaluation material in the training process and (2) PPM Activities monitoring book development training
