

TECHNICAL TRAINING FOR CHEMICAL MANAGEMENT IN EVERYDAY LIFE FOR THE COMMUNITY IN SLEMAN

by CORNELIA BUDIMARWANTI, DKK

ABSTRACT

PPM activities are carried out to overcome the problems faced by the community, namely on understanding the management of chemicals in everyday life. Equipment and daily necessities contain a lot of chemicals, which chemicals can be safe and can also be harmful to human health and the environment. Problems arise because many people do not / have not received complete information both formally and informally about the management of chemicals in everyday life. This PPM activity aims to 1) provide knowledge about the dangers of misuse of chemicals in general, nutrition in food and B3 for human health and the environment, 2) provide an understanding of the importance of managing chemicals correctly and safely, 3) provide an understanding of how to provide P3K correctly and safe in the event of an accident due to B3 exposure.

PPM activities were carried out in the hall of the Klepu rectory on July 7, and September 8, 2019. PPM activities were attended by housewives, women members of the PKK. The material presented is Getting to Know Various Chemicals in the Household (Das Salirawati), Techniques to Store Food in the Refrigerator (Lis Permanasari), How to Store Medicines at Home (Endang Widjajanti LFX), and Tips for Removing Various Stains (Cornelia Budimarwanti).

The PPM activities carried out are useful to increase knowledge, skills and experience for the participants.
