

CREATING ENVIRONMENTAL CARE IN JUNIOR HIGH SCHOOL STUDENTS THROUGH THE ADIWIYATA SCHOOL PROGRAM IN YOGYAKARTA

by Taat Wulandari, Primanisa Inayati, Satriyo Wibowo

ABSTRACT

Abstract

This study aims to describe efforts to inculcate environmental care attitudes in junior high school (SMP) students through the Adiwiyata School program in the Special Region of Yogyakarta (DIY).

This research is a qualitative research with a case study approach. The research location is in junior high school which is the Adiwiyata School in DIY. The sampling technique is purposive sampling. Data collection techniques using interview techniques, observation and documentation. The data validity technique used triangulation of data collection techniques. Data analysis used descriptive analysis technique.

The results of the study shows that the effort to instill environmental values ??through the Adiwiyata program in junior high schools in Yogyakarta has been going well through well-planned efforts through the integration of environmental care values ??in document 1 KTSP, integration of environmental care values ??in RPP, campaigns and publications of caring movements. environment, as well as adiwiyata cadres. The implementation of inculcating the value of environmental care to students through the Adiwiyata program is reflected in the daily learning of students. The results achieved during the implementation of the Adiwiyata program in schools are reflected in the ability of students to form habits of caring for the environment. The obstacle to inculcating an attitude of caring for the environment faced by schools is the ongoing covid-19 pandemic in schools, making students who attend school starting from the 2020/2021 school year not get the experience of inculcating an attitude of caring for the environment directly in the school environment.
