

WORKSHOP PEMBUATAN BAHAN AJAR MATEMATIKA BERBASIS MARKDOWN BAGI GURU MATEMATIKA SMA

by Hartono, Wahyu Setyaningrum, Husna Arifah, Sahid, Ilham Rizkianto, Murdanu

ABSTRACT

This community services aimed to introduce Markdown application to mathematics teachers particularly at senior high school level. Markdown is a free application and has simple language programming yet powerful. It can be used to some elements in text performance and other documents. The main purpose of using Markdown is to write documents that are compatible for many formats and can be converted into HTML documents.

The community services held a workshop in three days with forty-six mathematics teachers in Yogyakarta. The first day, all participants were introduced to Markdown. Meanwhile the rest two days, the participants explored the Markdown to develop student' worksheet in a group that was consisted of three teachers. Therefore, the teachers could familiarized using Markdown in developing teaching materials in the next future.

Kata Kunci: *Markdown, student' worksheet*
