

Development of The Blended Learning Model in Learning of The Curriculum Development

by Dr. Ali Muhtadi, M.Pd.

ABSTRACT

Abstract

The purpose of developed this blended learning model is 1). Generating blended learning design in learning of the curriculum development, 2). Producing online learning modules with the moodle platform at Besmart UNY. Development activities Mixed learning begins with determining the right mixed learning model to improve student competencies in the field of curriculum development. To determine the right mix of learning models in learning of the curriculum development, a needs analysis is carried out. And to produce systematic learning design learning analysis is done first.

This development has resulted product the blended learning designs. This Flipped learning is online learning that was developed and organized with the aim of enriching face-to-face lectures, not replacing some face-to-face meetings. This means that face-to-face learning continues at 16 meetings, while online learning is provided outside face-to-face meeting hours. Development also produced online learning modules using the integrated moodle platform at BESmart UNY. The generated online module is ready to be used for 2020 recovery.
