ABSTRACT

Character education is carried out in various ways, including habituation. One way to get used to this character can be done through fun activities, such as using regional songs. Everyone is aware of this, but not all teachers have sufficient competence. In this regard, character training is needed which can help teachers apply character training to their students. This training aims to provide teachers with the knowledge and skills to familiarize themselves with characters through regional songs with their students.

This service uses a training and mentoring approach. In training activities, the service provides training to teachers offline. This training activity was continued with assistance for teachers in carrying out learning for teachers and students. Service activities were carried out at Kampung Emas Elementary School in Seyegan Sleman Yogyakarta. In this implementation, teachers support and learn to use regional songs. Students followed well, took the values ??from the regional songs they learned, and felt very happy, so they will apply them to further learning.
