

# EDUCATION IN THE PERSPECTIVE OF THREE DIMENSIONAL TIME BASED ON THE QUR'ANIC VERSES: A SYMBOLIC-PHILOSOPHICAL STUDIES

by Sardiman, AM

## ABSTRACT

The purpose of the study was to analyze the concept of education is based on) the Quran; 2) Examines the philosophical symbolically educational process which takes place in the past (in mother's womb) according to Qur'an; 3) analyze the problems of education in the present (in the life of the world) in view of the Koran; 4) Menganganalisis symbolically philosophical implications of the life in the hereafter as the impact of the process of education and life in the world view of the Glorious Qur'an daam.

In this study the author uses descriptive content analysis research type. Analysis of the contents solely for description, describing the aspect – aspects and characteristics of a message. The approach used in this study i.e. analysis approach (content analysis). Method of data collection; the documentation and study of the literature. Data analysis in the form of study, grouping, systematization, and interpretation of data in order to verify a phenomenon has a social value, scientific-academic. See the purpose of this research, then the validity is the validity-oriented data (data oriented). The research was carried out from February-August 2018.

The results of this research: education is the process of building the whole person. This is very clearly reflected in the formulation of national education goals in Act No. 20 of 2003 Annual National education system, article 3. mandates of national education serves to develop the ability to form character and the civilization of the peoples dignity in the framework of the intellectual life of the nation, aimed at the development of potential learners to become human faith and piety to God Almighty, precious, healthy, have learned, accomplished, creative, independent, and democratic citizenship as well as responsible.

Education in Indonesia is already clear directions to deliver successful learners in the world the peseta and happy in the afterlife. However in practice it is rarely noticed how organised education can bring his protégé participants successful and happy in the afterlife. In practice education developed have not been touched in three dimensions of time: past, present, and consequently how the life to come (in the hereafter) symbolically-philosophical. The implications of the process of education that so it's not surprising if gave birth to human-humans just chasing success in the world. Fenonena religious people also corruption, follow anarkhis and violence, intolerance, conflict ends-unjungnya worldly affairs/material, drugs and other unscrupulous acts of piety, the individual has not given birth to the social piety of God promised bring salvation in the afterlife.

Kata Kunci: *Education, the three dimensions of time, Al-Qur'an, study of the symbolic-Philosophical*
