## **ABSTRACT**

After pretest conducted after the opening ceremony by the MGMP Board of PPKn subjects at SMP/MTs teachers, it was found that there were still teachers who could not master the creation and development of learning media, especially online media and the development of making teaching materials with well. In terms of PPKn learning in the present to attract students' interest, it needs to be developed with media that can be obtained through internet media. The results of the PPM activities show that the enthusiasm of the participants was also seen at the time of exposure to the material for the development of teaching materials and the development of learning media through internet media.
