ABSTRACT

The purpose of PPM activities is to equip elementary school teachers with the theoretical experience and practice of developing sports and health learning education evaluation based on KTSP and 2013 curriculum.

The target of implementing PPM activities is 32 elementary school teachers in Kecamatan Muntilan, Kabupaten Magelang, Jawa Tengah. The method of implementing PPM activities through tutorials and practices. Evaluation of the implementation of activities using process and product evaluations in the form of assessment instruments made by participants. While the instruments used in PPM activities are observation sheets and product assessment sheets. Data analysis using percentage descriptive analysis.

The results of the PPM activities are as follows: (1) the results of the process evaluation are PPM participants get satisfaction, conformity with the needs, PPM participants are enthusiastic and participants understand about how to make an assessment instrument. 32 draft assessment instruments are arranged, and (3) the results of the evaluation of meaningfulness that the PPM activities are meaningful in a very good and good category. So it can be concluded that this PPM activity can equip the teacher's understanding of the assessment instrument and is able to make it individually.
