

DEVELOPMENT OF TEACHERS' ABILITY TO UTILIZE THE POTENTIAL OF THE SCHOOL SURROUNDING THE ENVIRONMENT FOR BIOLOGY LEARNING

by Atik Kurniawati, Paidi, Yuni Wibowo, Slamet Suyanto, Triatmanto, Suratsih, Rio Christy Handziko

ABSTRACT

The aim of this lesson study activity is to: Improve the ability of Madrasah Aliyah biology teachers to utilize the potential of the environment around the school as a source of biology learning, develop learning tools that are oriented towards utilizing the potential of the environment around the school, improve the quality of learning in model schools.

This lesson study activity took place in the FMIPA UNY laboratory and at MAN 1 Bantul Yogyakarta and MA Unggulan Al Imdad Bantul. The time for implementing lesson study activities lasts for 1 semester with 3 meetings consisting of 3 activity cycles with each cycle carried out in the stages of Plan, Do, and See.

The lesson study was carried out involving two model schools, namely MAN 1 Bantul and MA Unggulan Al Imdad Bantul in Biology subjects, Fungi (Fungi) subjects. The lesson study was carried out in 3 cycles.
