

# WRITING TRAINING ON SCIENTIFIC WORKS BASED ON CLASS ACTION RESEARCH RESEARCH IN YOGYAKARTA

by Suharjana, Ria Lumintuarso, Widiyanto

## ABSTRACT

Yogyakarta as a city of students should always try to show excellence in education, therefore teacher development must always be spurred in such a way that education in Yogyakarta must always be superior to other regions in Indonesia. That is why the Community Service Program with the theme of PTK research-based scientific writing training in Yogyakarta City is intended as a vehicle to help teachers in The method used in this service is the method of lectures, discussions, workshops, questions and answers and the implementation of tasks and presentations. Conduct training with the following key material: Steps to compile Scientific Papers, Style of Research-based Scientific Scientific Work, Compose PTK Proposals, and Writing Practices PTK research This community service program can run smoothly with the participation of 33 teachers and school principals in East Jogja. PPM material consists of: 1) motivating teachers in scientific writing, 2) steps in scientific writing (identifying, selecting and formulating problems and choosing the title of research PTK, and compiling data collection instruments and understanding data analysis methods, 3) Assessing the style of the journal's environment scientific study of written materials, organizing, and making scientific writing concepts, writing literature, 4) Practice of making PTK proposals. At the end of this activity, the participants were asked to collect their work in the form of a CAR proposal. Like the initial purpose of this PPM, participants are expected to be able to make scientific work in the form of a CAR proposal. Of the 33 participants present there were 5 proposals that were feasible and ready to be accompanied for PTK research
