## **ABSTRACT**

The objective of the PPM is to train the teachers of MGMP Seni Budaya SMP in Bantul regarding the mastery of technique of work of art in the form of workshop of inovative creation of works of art, in order to achieve adequate competence so that the quality and competence of 29 teachers of Arts and Culture of junior high school in Bantul could be improved. It also facilitate the teachers of the junior high school in Bantul regency to disseminate the results of his innovative works of art through the exhibition activity.

The method used is the method of presentation to convey the theory about the creation of innovative art works and demonstration method to give examples directly to the participants of the training, and practice method to train the participants in creating innovative art works independently.

The material that is presented by the devotees can be accepted, digested, and well understood by participants. The number of participants are proportional to the number of participants. who act as instructors and tutors who make this training more conducive. This also supported by the ability of the participants in the field of fine arts because the majority of participants are the teachers who expertise in art, so that training can go on successfully and the participants can communicate with the speakers and other participants better.
