ABSTRACT

Collaboration among universities is a key tactic in the realm of contemporary higher education. The purpose of this study is to examine the model of higher education partnership of Yogyakarta State University, Indonesia.

This qualitative study was conducted from June to September 2023. Interviews and document analysis were conducted to gain information on the model of partnership at Yogyakarta State University. The interactive data analysis model by Miles and Hubberman was adopted in this study to extract, organize and draw some conclusions in this study.

This study also pointed out a number of difficulties that must be resolved in order to put cooperation into practise, especially in terms of the document preparation. This is to ensure that the documents are especially worth-reporting for the university ranking purposes. There is a need to develop an information system to help head of departments and or study programs to ensure the documents they [repare for a partnership meet the proper standards.
