ABSTRACT

The purpose of this activity is to improve teacher understanding and skills in developing higher-level thinking skills of students through the preparation of HOTS-oriented learning plans and conducting self-assessments.

This activity is in the form of training which contains an understanding of the importance of developing HOTS for students to improve the quality of elementary school learning, HOTS-oriented Learning Preparation strategies, HOTS-oriented Learning Preparation practices based on learners' ability baselines for each elementary school, and HOTS-based learning methods. After this training it is hoped that there will be a performance from the teacher in the form of a learning implementation plan.
