ABSTRACT

ABSTRACT

The purpose of this study is to: (1) develop assessment rubrics to make custom made clothing; and (2) knowing the feasibility of the assessment rubric for making custom-made clothing.

The development of the assessment rubric to make custom made clothing is a research development. Development models that adopt 4D procedures are: define (define), design (design), develop (development) and disseminate (spread). The custom made clothing that was studied was Adi Clothing. The sampling technique is done by purposive sampling, which aims to develop a rubric with more complex assessment aspects. Data collection techniques with focus group discussion, observation and questionnaires. The validity of the instrument uses content validity based on expert judgment. Reliability of instruments with rater and Kappa. Data analysis techniques were carried out descriptively.

The results of the study produced the assessment sheet and the Adi Busana assessment rubric: 1) the development of the rubric based on the assessment sheet by: a) reviewing the curriculum and RPS; b) determine Adi Budana's course and compile a rubric draft; c) rubric developed in accordance with the material in the RPS and description according to the rating scale, 2) based on expert opinion that the Adi Busana subject assessment rubric meets good quality so that it is categorized as feasible. Thus the rubric developed can be used as a tool for evaluating the Adi Clothing course.
