ABSTRACT

This community service program aims to introduce the use of interactive multimedia-based learning media with the *3D Page Flip application*, accompanied by android applications, in teaching and learning activities to MGMP Accounting teachers in Klaten district, Central Java.

The target audience for this community service is the MGMP Accounting teachers in Klaten Regency. Due to availability of facilities, this program aimed to have 30 teachers trained in the program. The training program was divided into two sections; lecture section and practice section.

The event was held for 2 days, on March 23, 2018 and March 29, 2018. This program was deemed success successful in terms of participans, because the number of participants surpassed this program's target. There were 41 participants attended this program while the target was only 30 participants. Most of participants was very excited and participate actively in the program. Participants provided positive feedback about the activity. They said that they received new inspiration in preparing a new type of multimedia-based learning media. Participants also expressed their thanks for the second theme of this training about village fund accounting, a new subject in Curriculum 13, which has been confusing for teachers.
