

**Tracer Study Department of Sports Education, Faculty of Science Sports and Health UNY through the
2022-2023 Graduate Survey towards the World University**

by Ahmad Rithaudin, dkk

ABSTRACT

The purpose of this study is to determine the competency profile of alumni of the PJKR Study Program after participating in the learning process at the PJKR FIKK UNY Study Program, identify the obstacles faced by alumni during the learning process, find out the relevance of the curriculum applied by the PJKR Study Program to the needs of the job market, provide input on department development, especially improving the quality of learning, obtain an overview of the competencies needed by alumni, provide input on quality improvement Learning in accordance with the demands of the world of work.

This Research Method is a survey. The population in this study is alumni or graduates of PJKR FIKK UNY Study Program. Data collection techniques using questionnaires through google form with sampling using purposive sampling techniques. Data for this study were collected using an open questionnaire. Data analysis techniques use quantitative descriptive analysis to be able to provide detailed information.

The results of this Tracer Study show that graduates of the PJKR Study Program in 2022-2023 can contribute to the First Key Performance Indicator. This can be seen from the percentage of alumni activities after graduation 62% work, the waiting period after getting a diploma 48% for 2-3 months and the type of work alumni 64% work in school institutions. The IKU indicator can support the University to become a world-class university
