

WORKSHOP FOR PREPARATION MATERIALS LEARNING OF SOCIAL SCIENCES EDUCATION BASED ON HIGH ORDER THINKING (HOT)

by Supardi, Saliman, Yuhanida Milhani, Raras Gistha Rosardi

ABSTRACT

At present there are still many teachers having difficulties in developing social studies learning models based on High Order Thinking, especially in preparing worksheets for participants in education. This community service aims to; improve the ability of IPS MGMP teachers in Wonogiri in developing IPS based learning models based on High Order Thinking using student worksheets.

Devotion is carried out with a workshop strategy, in which material reinforcement is carried out, exercises in arranging teaching materials in groups, and compiling teaching materials individually. The activity was attended by 40 social studies teachers in Wonogiri District, which were conducted through the face-to-face activities and one structured assignment.

Efforts to improve the ability of IPS MGMP teachers in Wonogiri in developing IPS learning models based on High Order Thinking using student worksheets were carried out with workshop techniques and individual assignments. From the results of the activity evaluation, the teachers showed progress in preparing teaching materials, as evidenced by the tasks compared to the pretest before the activity. Based on interviews with the participants, also obtained data that this activity is very useful and needs to be followed up with other activities, especially in developing information and communication technology-based teaching materials.
