ABSTRACT

The impact of the lack of public transportation fleets existing public transport passengers usually load exceeds the capacity, especially at odd hours to and from school either SMP, SMA / SMK. Therefore, many parents are forced to buy his motorcycle to be used to go to school despite being seated in junior secondary school or early in high school. This condition is very dangerous road safety given the young age and have not been able to control his emotions. But the old man was no other choice given the lack of publicly available fleet size. PPM implementation was preceded by socializing the importance of understanding the maintenance and repair of motorcycles, continuous assistance to Karangtaruna. PPM activities carried out by the Theory and Practice for 10 hours. The material of the theory include: (1) Safety Riding Motorcycles, and (2) Procedures and maintenance work and repairs. As for the practice of riding safety, and understanding of maintenance and repair of motorcycles. Participants PPM is youths Karangtaruna Kradenan Girirejo citizens. The implementation of PPM activities held on, 30 - May 31, 2016 from the hours of 08:00 to 5:00 p.m. thanks to cooperation between TIM PPM UNY with Yamaha Motor Indonesia as well as the support of village residents Girirejo. Supervisor 3 (three) people, the companion of a technician 1 (one) and three (3) members of the student. Participants youth Karangtaruna citizens Kradenan Girirejo as many as 20 people with a companion of Mrs. Lurah, with the completion of this PPM participants expressed pleasure and satisfaction. They feel that science is very valuable to maintain and care for its motorcycles are always in prime and ready for use.
