ABSTRAK

Groups of fish farming in Hamlet Sawahan Wedomartani Ngemplak Lor is one affected by the eruption of Merapi. Beginning in 2012 after the eruption, the group revive fish culture ever developed. This effort was named "Mina Banyu Bening" with the concentration as a tourist village, especially catfish aquaculture education. Catfish farming is appropriate because the production of catfish in Sleman less than 6 tons /day of the needs of 10-17 tons. Catfish feed production constraint is costly : Rp.9.000/kg and sequester 50-70 % of operational costs . Therefore, this constraint becomes the feed to overcome the problems 1 and catfish feed making training conducted by utilizing local food . Catfish feed prices Rp.6.000/kg successfully created and has a moisture content of 15% so as to float for 15 minutes. Training feed manufacturing is done in theory and practice , and work well with the aid of a pelletizer support (mixer and printer) . As a tourist village, issue 2 is a constraint in setting up typical souvenirs shop based catfish and menu restaurant based catfish. Obstacles overcome by training the manufacture of various processed : catfish pilus crackers , catfish floss , skin "rambak" catfish, catfish nuggets, meatballs catfish and menu restaurant " gudeg catfish ". Village tourism requires professional management so that management raises three issues management . Addressed by the management of the management training and motivation.
