

Pelatihan Penggunaan Perangkat Lunak “SIMAKSSB” Untuk Penilaian Pengelolaan Sekolah Sepakbola dan Tata Kelola Kompetisi Pada Pengurus Sekolah Sepakbola Se-Kabupaten Sleman

by Prof Yustinus Sukarmin, MS, dkk

ABSTRACT

PKM aims to provide competency transfer in the use of the SIMAKSSB application. The SIMAKSSB application is an application developed by the FIK UNY research team to support the management of SSB (football school) based on a quality management system. The SIMAKSSB application has two main services, namely the accreditation system or SSB performance assessment by PSSI and competition management services at a young age under PSSI. The use of the application can be carried out if the parties involved in governance understand the main tasks and steps that must be carried out. Competencies or skills in the use of management information systems have been given by the service team to SSB administrators and admins with training methods with theoretical and practical approaches in the computer laboratory. The results of the service show that SSB admins are able to use the application, it is proven that all admins are able to complete administrative tasks by using the referssb application.
