ABSTRACT

Value-based education is urgent to develop from the early childhood education level because it serves as a foundation for academic and other aspects that must be developed optimally. The Community Service Program aimed at to train Aisyiyah Bustanul Athfal Kindergarten teachers in Banguntapan, Bantul so that they can develop learning tools by integrating values-based education. The target to be achieved is a simple animation video for online learning in kindergarten. The training subjects were 30 Kindergarten teachers in Banguntapan Sub-District. The training methods used were: 1) varied lectures, 2) discussions, 3) assignments, 4) mentoring. The results of the training activities were: 1) The teacher groups was able to make seven simple animation videos as value-based education online teaching materials; 2) The values ??to be taught are help others, mutual cooperation and cleanliness. The supporting factor for the activity is the partners are proactive and ready to help with various training preparations, the teachers are participating in the training enthusiastically and happily. The inhibiting factor is the Covid Pandemic 19 requires that activities be carried out in accordance with health protocols so as to limit the movement of participants and teams in carrying out interactions between others. In general, it can be concluded the value-based education training for 'Aisyiyah Kindergarten teachers in Banguntapan, Bantul has been successful in accordance with the stated objectives.
