

Blended Learning Multimedia Learning Courses S2 Study Program TP

by Herman Dwi Surjono

ABSTRACT

Multimedia Learning Subjects are compulsory subjects in the S2 Study Program Learning Technology at UNY Postgraduate Program offered to all TP study program students in semester 2. After completing courses with a credit load of 2 credits this student is expected to have competence in developing Interactive Learning Multimedia products (MPI) professional. To achieve that competency, this subject also discusses principles, design and evaluation of instructional multimedia, characteristics and methodology of multimedia learning software, MPI concepts, and the process of digitizing the multimedia components. In addition, students will explore and use authoring tools to edit and produce interactive learning multimedia applications (MPI).
